**ISTC CIRCUIT IS
80M * 40M ASPHALT OUTDOOR**

The asphalt was laid on top of a 1.5 feet reinforced concrete foundation.
The foundation was built with a slight gradient to allow for water to run off in a controlled manner

- The top layer of the concrete was further topped off and leveled to ensure that the final layer was absolutely flat without and bumps or waves.

- Dual layer or asphalt laid on top of the foundation, and industrial steam rollers were used to compact each layer , ensuring that the surface is pristine and flat.

- Layout of the track will be fully updated end of Feb and the track closed till the world championship.

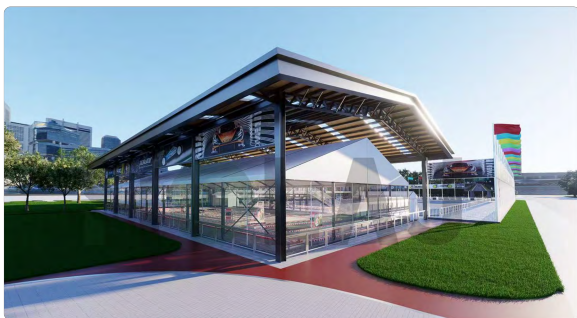

**FULLY BUILT-UP TENT ENCLOSURE
HOUSED WITHIN THE COVERED MULTI-PURPOSE
TRACK AT THE NEW GDC FACILITY.**

Tent enclosure will be climate controlled and shield the track from any elements of the changing weather.

-
Track will be ETS carpet laid on top of a raised platform ensuring that it will not be affected by environmental changes and be pristine for 1/12 racing.
